We learn that the steamers Bay State, Plymonth Rock and Worcester, which saved the propeller Charles Osmod from destruction by fire, were provided with H. R. Worthisotor's Kyerry Stram Pump, and it is to this Invention that the efficiency in this service is attributable. We find, upon inquiry, that but few steamers or steambests are without them, and the security they offer, both from fires and lears, seems to demand that all should be provided with them.

The Stock Market was dull this morning, and very beavy for the leading fancies. A disposition evinced to depress Reading influenced the remainder of the market, to which was added the effect of the light arrival of gold by the California boat, and the foreign acvices, which were not considered by operators as favorable to peace. The bears were by this state of things induced to sell, while buyers held back. In the Money Market proper there was no feature to cause any change. Between the Boards the market was very heavy, Erie falling off to 50; and Reading to 84, but at the Se and Board there was a more buoyant feeling, and a portion of the decline of the morning was recovered. Erie improved to 51. The earnings as reported for March, \$492,000, were considered as favorable. Reading closed at \$41. Too tunnage of this road is enormous. This week it will be, it is cetimated, something over 50,000 time. The net profits of March were \$192,000, against \$95,000 in March 1854, and the net profits of the four months ending 31st March were \$484,000. It is estimated that the net profes to the 20th April will be sufficient to pay the year's interest on the whole debt of the road. leaving seven months and a half's earnings for divi dends. This is probably somewhat over-estimated Hudsen River and Central were heavy. Panama was steady. The March earnings are said to have been about \$120,000. Western roads were quiet at pro vious prices Nicaragua is not active, but very firm at 16]. The arrangement between this Company and the other route is still uncompleted, and the routes are worked in strong competition. There is an undercurrent of opinion in the street that some operation is going on in Nicaragua which will produce soon a very active market. It may be well to remark that corvicted of petit larceny on the store of Thus Christy from which they stole goods to the value of \$25. Remanded for the Parana Kailroad Company is entirely disconnected with the competition between the two routes to California: whatever be the price of through passage, the road gers \$25 fare. In Railroad Bonds the business was moderate, and prices without important change. About \$100,000 Erie, 1875, were taken at 881, for foreign account, a large portion of which was

The Bank Statement this week is favorable, insaexpension of the Bank loans, which has been going on for several weeks, in the face of a declining specie line. It is generally estimated that the Wednesday steamer will take at least a million in gold, although we cannot learn of actual engagements of over \$650,000. The North Star and the Washington, on Saturday, will also take some gold, and it is probable the shipments of the week will reach a million and a half.

The private letters from California indisate a much larger shipment of gold by the next steamer than by the last. There were considerable amounts of gold expected from the interior, and if sellers would submit to the reduced prices for dust, a considerable amount would come forward. Messrs. Page, Bacon A Co have collected from their assets about \$530,000, and their creditors have extended about \$540,000. They are drawing on New-York at sight, supposing their funds here to be available.

The Lexington and Danville Railroad is progress ing rapidly to completion. Citizens of Cincinnati ave recently taken \$100,000 of additional stock to aid in its completion. This road will be a valuable feeder to the Covington and Lexington road. This line will, at an early day, be completed on to Nashville, thus giving a direct railway communication to all the South from Cincinnati.

The Springfield, Mount Vernon and Pittsburgh Railroad Company, whose coupons are unpaid, pro-pose to make a third issue of Mortgage Bonds at 70, for the payment of the past due coupons, and those to mature for the next two years' and for the liquidation of the floating debt, which is \$250,000, &c. The amount required to finish the road is \$693,000, making with the floating debt, two years' coupons, &c . \$1,089,000; to meet which the Company has \$515,000 proold bonds, and unpaid stock subscriptions, \$187,500; leaving \$492,500 to be raised by the new There was a fair amount of orders for our securi-

"Mr. Schoonmaker, who now succeeds to this office, is abundantly competent for the position, and is in all respects a gentleman of integrity of character, and will, we doubt not, make an excellent Saparintendent. It is much more grateful to us to be able to speak well of the appointments of our political opponents, than to feel called upon to conde na them.

"In the charge which occurs in this office, it is officer, and to the banks, to have everything relating to the immense amount of securities of the office chaitely settled and understood. To facilitate this, Mr. St. John has appropriately addressed the following circular to the banks:
